CHOOSE THE RIGHT DOOR SOLUTION

*Every workspace has different needs. Whether your facility requires fast pass-through traffic, controlled personnel access, retractable openings, or large sliding panels, **AmCraft** offers multiple door options designed to work with your industrial curtain system.*

Choose the right door style for:

- ☒ Facility Layout
- ☒ Traffic Flow
- ☒ Access Needs
- ☒ Environmental Separation

Need/Priority	Recommended Door
Frequent forklift or cart traffic	Strip Door
Personnel walk-through	Zipper Door Strip Door
Larger opening with sliding panels	Suspended Retractable Door
Wall-mounted sliding access	Barn Door
Environmental separation	Zipper, Suspended, Strip, or Barn Door
Fast hands-free movement	Strip Door
More structured closure	Zipper Door
Open space when retracted	Suspended Retractable or Barn Door

Strip Doors

Fast, flexible access for high-traffic areas.

Strip doors allow personnel, carts, forklifts, and equipment to move through an opening with minimal interruption to workflow. The overlapping PVC strips help maintain separation between spaces while still allowing visibility and easy pass-through access.

They can also be Velcro attached to single-layer curtains (only) so that the strip door retracts with the curtain.

Note: Size parameters apply

Strip Types:

- 8" Flat or Ribbed, Clear
- 12" Flat or Ribbed, Clear
- 12" Safety Orange
- 8" or 12" Tinted Bronze, Blue or Red
- 8" or 12" Black

Bracket Options:

- Universal Mount
- Header Mount
- Wall Mount
- Easy Mount in Aluminum
- Easy Mount in Polymer

Zipper Doors

Controlled access with a roll-up door design.

Curtain Compatibility: Single-Layer Curtains ONLY

Zipper doors create a defined access point within your industrial curtain system.

Dual side zippers, on the left and right sides of the door flap, allow the door flap to open when needed. The Velcro straps on top hold the rolled panel securely in place during use.

***Note:** Retracts with curtain.
No additional metal bracketry.

Standard Sizes:

- 7' x 3'
- 8' x 4'
- 8' x 6'
- 8' x 8'
- 8' x 10' - Maximum Size

Options:

- Window
- Floor Sweep

847-439-4565 | www.amcraftindustrialcurtainwall.com | sales@amcraftonline.com

Suspended Retractable Doors

Selective retractable access for larger curtain systems.

Curtain Compatibility: Single-Layer | Thermal | Acoustic

Suspended retractable doors are ideal for tall or wide curtain systems where only specific sections need to open.

Vinyl panels retract left and right along a threaded rod mount track, creating access where needed while allowing the surrounding curtain system to remain in place.

***Note:** Maximum suspension distance = 5'

Options:

- Vision Panel
- Floor Sweep
- Valance
- Chain Bottom
- Velcro or Magnet Edges
- Magnetic Center Joint

847-439-4565 | www.amcraftindustrialcurtainwall.com | sales@amcraftonline.com

Barn Doors

Full opening access for larger doorways.

Curtain Compatibility: Single-Layer | Thermal | Acoustic

Barn doors are ideal for openings where the full doorway needs to remain clear when the curtains are open.

Flat vinyl panels slide away from the opening along a mounted track system, creating wide access for equipment, materials, and workflow movement.

Options:

- Vision Panel
- Chain Bottom
- Floor Sweep
- Velcro or Magnet Edges
- Valance
- Magnetic Center Joint

***Note:** We recommend an overlapping trolley in the center where the curtain panels meet to create a 12" overlap.

Planning Your Door Opening

Helpful details to consider when choosing, supplying, or installing a door within your curtain system.

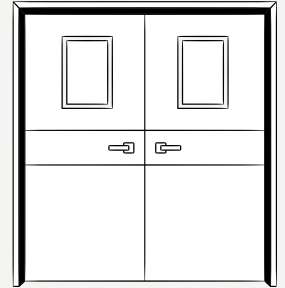

Swing Doors

Roll-Up Doors

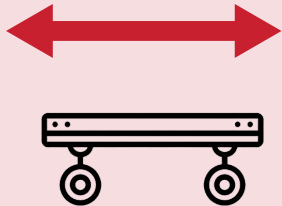

Overhead Doors

Specialty Doors

You may choose to use your own door with our curtain system. We can custom-fit our industrial curtain system around your existing door to provide a clean, functional solution that works with your operation.

Important: Some Doors Move with Retractable Curtains

Some door styles move with retractable curtains, regardless of whether the curtain is single-layer, insulated, or acoustic. Contact our sales team to help you determine the best door configuration for your space.

Frames, Bracing & Support

Some door openings may require additional support or bracing depending on door style, opening size, traffic type, and mounting conditions, especially for forklifts, carts or equipment.

Support may be provided via a self-supporting frame, or through suspended support from the building structure.

Helpful Details to Provide

- ☐ Opening width and height
- ☐ Door type or preferred access method
- ☐ Curtain type
- ☐ Photos of installation area
- ☐ Wall, ceiling, or structural mounting details
- ☐ Required clearance around the opening
