

Buyer's Guide

WAREHOUSE CURTAIN WALL

More Than a Curtain.
A Solution Built Around Your Space.

847-439-4565 | www.amcraftindustrialcurtainwall.com | sales@amcraftonline.com

THE AMCRAFT ADVANTAGE

The Difference Is in How We Work With You.

Many warehouse curtains look similar on paper. What matters is how well the system works in your facility and the support you receive throughout the project.

At AmCraft, every warehouse curtain system is custom-built around your actual space and application. We take the time to understand your layout, access needs, mounting conditions, workflow, and other project details before production begins. And you have a dedicated AmCraft team member to contact with your questions.

CUSTOM-BUILT SOLUTIONS

Every system is built around your facility. Dimensions, layout, curtain movement, visibility, access, mounting, track, and optional features can be customized to fit your project.

1:1 PROJECT SUPPORT

Work directly with an AmCraft team member who can review photos, measurements, sketches, facility conditions, and project questions with you before a quote is created.

REAL PEOPLE REAL GUIDANCE

Your quote is reviewed by an AmCraft team member who understands the application. Have a question or project change? You know who to call.

Custom-Built for Your Space. Supported Every Step of the Way.

847-439-4565 | www.amcraftindustrialcurtainwall.com | sales@amcraftonline.com

BUILT AROUND YOUR FACILITY

Your space sets the plan. We build around it.

Every facility brings different dimensions, workflows, access needs, and mounting conditions. AmCraft uses those details to build a warehouse curtain system around how your space actually needs to function.

LAYOUT & CONFIGURATION

Configure the curtain around the area you need to divide, enclose, or keep flexible.

Straight • L-Shape • U-Shape • Four-Sided • Custom Layouts • Stationary • Retractable • Combination Systems

CURTAIN STYLE & VISIBILITY

Choose the level of separation and visibility that works for your application.

Solid Opaque • Clear Vision Panels • Opaque/Clear Combinations • Color Options

ACCESS & FUNCTION

Plan the system around how people and equipment need to move through the space.

Personnel • Forklifts • Carts & Equipment • Maintenance Access • Custom Openings

MOUNTING & FACILITY CONDITIONS

Account for the structures and obstructions already present in your facility.

Beams • Columns • HVAC • Sprinklers • Lighting • Pipes & Utilities • Limited Clearance

Your facility doesn't have to fit a standard curtain system. Your curtain system should fit your facility.

1:1 SUPPORT FROM START TO FINISH

You'll have a dedicated AmCraft contact throughout your project.

Warehouse curtain projects involve more than choosing a size. Your AmCraft team member works through the details that affect the final system and stays available when questions arise.

Not sure what details to gather? Our Warehouse Curtain Site Assessment Guide can help you document measurements, layout, access, mounting conditions, and other project details before we review your system with you.

1. START WITH YOUR SPACE

Tell us what you need the curtain to do and what you're working around. We'll start by understanding the application, layout, access needs, and facility conditions that matter to your project.

2. REVIEW THE DETAILS

We'll talk through layout, curtain movement, access, mounting conditions, track configuration, materials, and any facility-specific concerns.

3. REFINE THE SYSTEM

Your quote is prepared around the actual project. If details change or questions come up, your AmCraft team member can help adjust the system before final specifications are confirmed.

4. STAY CONNECTED

Our support doesn't end when the order ships. We remain available for installation questions, replacement components, additions, modifications, and future projects.

WE DON'T INSTALL YOUR CURTAIN SYSTEM. WE DON'T LEAVE YOU ON YOUR OWN, EITHER.

We help with your questions before, during, and after installation.

Installation is one of the most common concerns we hear from warehouse curtain customers. While AmCraft does not provide installation services, our team can help you prepare for the process and answer questions about your curtain system, track, mounting, and project conditions.

PLAN AHEAD

The more we understand about your facility before production, the better we can plan for the conditions that may affect your curtain system.

Photos • Measurements •
Layout • Mounting Location •
Track Path • Obstructions

USE OUR RESOURCES

AmCraft provides installation and mounting information to help you and your installer better understand the system.

Clearance

COMPARE MORE THAN THE PRICE

What are you really getting with your quote?

Cost matters when you're planning a warehouse curtain project. But price alone doesn't tell you how well the system will fit your facility, how much can be customized, or what kind of help you'll have when questions arise.

**WHEN
COMPARING
QUOTES,
ASK...**

Is the system built for my facility?

Look at whether the curtain is configured around your dimensions, layout, access needs, workflow, and mounting conditions.

What can actually be customized?

Compare options for layout, stationary or retractable sections, visibility, access, track, sealing, and other project-specific features.

Who is reviewing my project?

AmCraft quotes are reviewed by a live person who can work through photos, measurements, sketches, and project details with you.

What support is available before installation?

Ask what installation guides, mounting information, track resources, and customer support are available to you.

Who do I contact when I have a question?

Having a dedicated curtain expert matters when something changes or you need clarification.

What happens after the order ships?

Consider whether support is available for installation questions, replacement components, additions, modifications, or future projects.

A quote should reflect more than square footage.

Look at the system, the customization, and the support that comes with it.

WHY CUSTOMERS CHOOSE AMCRAFT

Built here. Customized for your space. Supported by real people.

Choosing a warehouse curtain manufacturer involves more than comparing the curtain itself. AmCraft helps customers work through project details, customize the system around their unique facility needs, and stay connected with a real individual from quote through follow-up.

What You Can Expect From AmCraft

Custom-Built in Illinois

Your curtain system is manufactured at our Elk Grove Village facility and built around your project.

Manufactured In-House

We manufacture our custom systems rather than simply reselling a finished product.

A Dedicated AmCraft Team Member

You have a real individual to contact when questions arise or project details change.

Custom Quotes Created & Reviewed by a Real Individual

Your quote is built around your actual project, not generated from a generic online configuration.

Support After the Sale

Need replacement components, additions, or help later on? We're still here.

Customers Who Come Back

Customers return to AmCraft for future projects, changes, and additional systems.

Ready to talk through your warehouse curtain project? Contact AmCraft for a custom quote.
